

# OPERATING INSTRUCTIONS

- 3) Wait five minutes to allow gas, that may have accumulated in the main burner compartment, to escape. If you do smell gas, follow the instructions on the front of this manual. If you don't smell gas continue on to the next step.
- 4) Turn the gas control counterclockwise to "PILOT".
- 5) Push in control knob all the way and hold in. Immediately push red button on spark igniter until pilot lights. Continue to hold the control knob in for approximately one minute, then release the gas control knob. The pilot flame should continue to burn. If the pilot does not remain lit, repeat operation allowing a longer period before releasing gas control knob.
- 6) Turn gas control knob counterclockwise to "ON".
- 7) Use rocker switch to operate main burner.
- 8) Rotate the flame height regulator to adjust the flame height higher or lower.

## SHUTDOWN PROCEDURE FOR (GR57H / GR58H)

- 1) Use the rocker switch to turn off the main burner.
- 2) Push in the gas control knob slightly and turn clockwise to "OFF". Do not force.
- 3) Turn off all electric power to the appliance if service is to be performed.

## FIRST FIRE

The first fire in your stove is part of the paint curing process. To ensure that the paint is properly cured, light the unit and leave it on for 5 minutes and let it cool down for 30 minutes. Repeat 3 or 4 times. When first operated, the unit will release an odour caused by the curing of the paint, the burning off of any oils remaining from manufacturing and burning off the starch in the gas logs.

The glass panel will require cleaning after the unit has cooled down. **DO NOT ATTEMPT TO CLEAN THE GLASS WHILE IT IS HOT.**
