

1. Distribute one layer of rock wool to cover all round burner ports. Do not cover rectangular slots, located in front and rear.

Figure 58

**NOTE:** Placing rock wool on burner provides glowing embers. For best results, pull the rock wool apart into pieces the size of a dime or smaller.

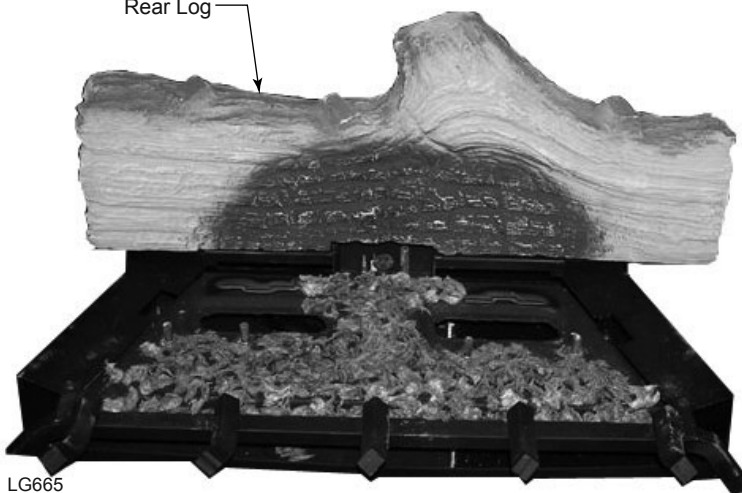

LG664

Figure 58 -  
Place Rock Wool

**CAUTION**

Do not use the entire bag of rock wool to cover the burner. This could cause the flame to burn poorly and may lead to sooting.

Rear Log

LG665

2. Place the rear log by aligning the holes in the bottom of the rear log with the two pins located at the rear of the burner on the bracket. Figure 59

Figure 59 -  
Place Rear Log

Left Middle Log

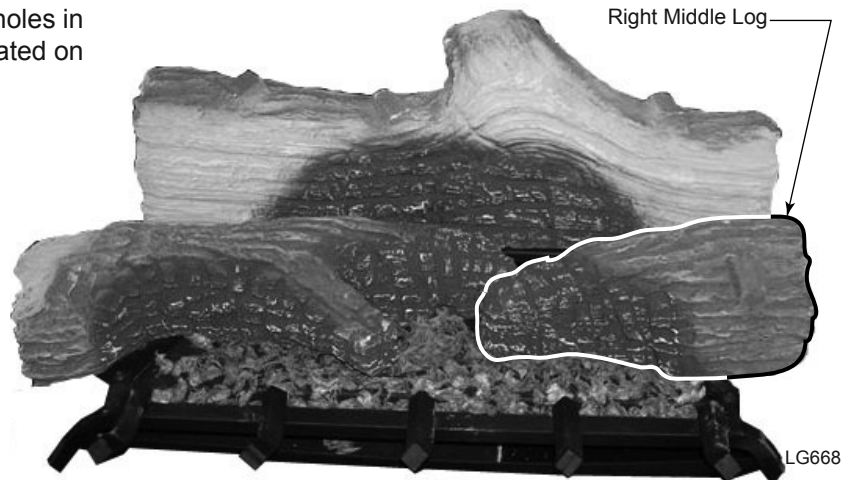

3. Place the left middle log by aligning the holes in the bottom of the log with the two pins located on the left side of the burner. Figure 60

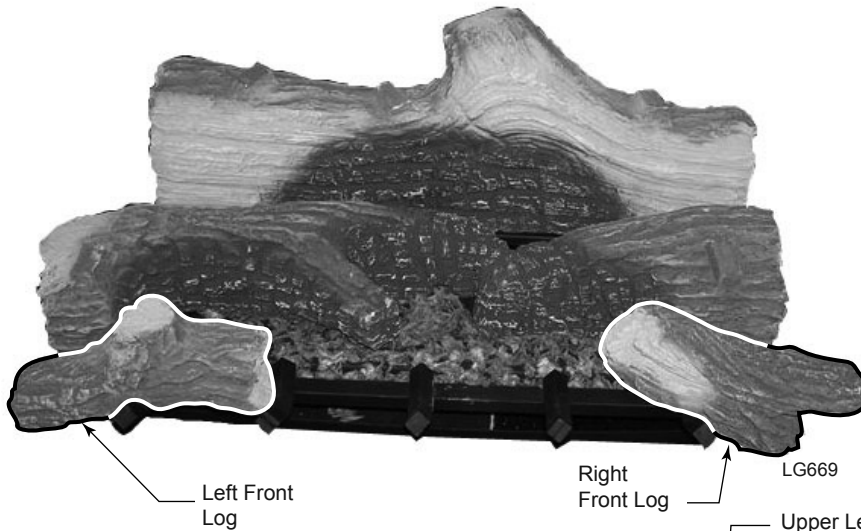

LG667

Figure 60 -  
Place Left Middle Log

- Place the right middle log by aligning the holes in the bottom of the log with the two pins located on the right side of the burner. *Figure 61*

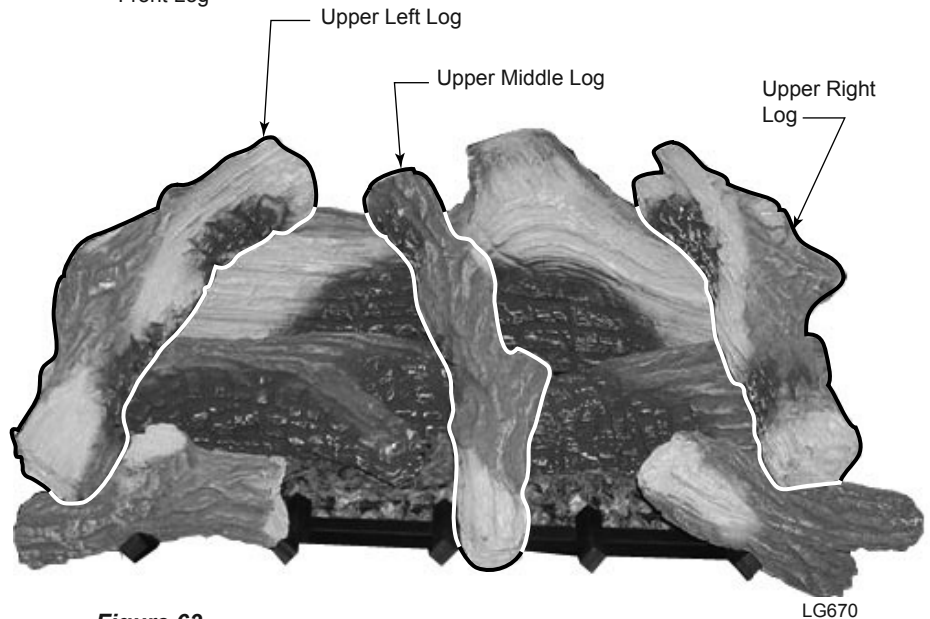

**Figure 61 -  
Place Right Middle Log**

**Figure 62 -  
Place Left and Right Front Logs**

- Place the front left log by setting the notch on the bottom of the log on the very far left tong of the grate, and resting the right end of the log onto the second left tong of the grate. *Figure 62*
- Place the front right log by setting the notch on the bottom of the log on the very far right tong of the grate and resting the log on the leg of the grate. *Figure 62*

- Place the upper left log by matching the two protrusions on the rear and left middle logs with the notches on the bottom of the upper left log. *Figure 63*
- Place the upper middle log by matching the protrusions located at the middle of the rear log with the notch on the bottom of the log. Rest the front end of the log on the right side of the middle tong of the grate. *Figure 63*
- Place the upper right log by matching the two protrusions on the rear and right middle logs with the notches on the bottom of the upper right log. *Figure 63*
